ABOUT ME

Full Stack Developer and Founder of CodeZorex with experience in building web applications, POS systems, and business solutions using Laravel, MySQL, JavaScript, and modern web technologies. Passionate about creating scalable software and solving real-world business problems.

EDUCATION

2024 - 2026

HND in Computing (Software Engineering)

ESOFT Metro Campus – Trincomalee

Completed Higher National Diploma in Computing with a specialization in Software Engineering. Gained knowledge in software development, web technologies, database management, system analysis, and application development through academic coursework and practical projects.

ACADEMIC PROJECT

KickBlast Judo

Programming

Mastered OOP principles and error handling to translate complex business requirements into stable, functional code with clean and maintainable syntax.

Velvet Vogue

Website Design & Development (WDD)

Developed responsive, performance-optimized interfaces using HTML and CSS, focusing on UI/UX best practices, accessibility, and seamless cross-device compatibility.

PROFESSIONAL PROJECTS

Founder & Full Stack Developer

CodeZorex | 2026 – Present

- Founded and manage CodeZorex, a software development startup focused on web applications, POS systems, and business solutions.
- Developed custom Laravel and MySQL based systems for local businesses.
- Led UI/UX design, project planning, development, testing, and deployment.
- Worked directly with clients to gather requirements and deliver tailored software solutions.
- Managed source code using Git and GitHub while ensuring maintainable and scalable architecture.

JR Marketing POS System | Full Stack Developer - 2026

- Designed and developed a complete POS and inventory management system using Laravel, Livewire, MySQL, JavaScript, and Tailwind CSS.
- Implemented sales management, inventory tracking, customer management, expense tracking, and reporting modules.
- Deployed and maintained the system for active business operations.

Food Delivery Management System | Full Stack Developer - 2026

- Designed and developed a restaurant ordering and delivery management platform.
- Implemented customer ordering, rider management, order tracking, and admin management modules.
- Developed responsive user interfaces focused on usability and performance.

Student Management System (ESOFT Project) | Full-Stack Developer

Developed a modular, scalable Laravel/MySQL e-commerce platform with RBAC and payment integration. Features a responsive admin dashboard for sales analytics and secure real-time order tracking.
